

Sat Jinda Kalyana P.G. College, Kalanaur (Rohtak)

Environmental Club

Our planet is currently facing an increasing number of environmental challenges which includes climate change, Global warming, water scarcity floods; pollution has become more critical than ever before. The college lays emphasis on environmental sustainability on its campus and surrounding areas as it is the need of the hour. Realizing the importance of environment and its protection the college has a functional environmental club. It is a platform on which students gain knowledge about environment, its degradation and the need for protection of environment.

Primary objectives of the club:-

- Environmental club strives for a greener and cleaner campus.
- To create awareness and sensitivity among students and society about the total environmental issues.
- To build attitude to help individuals and social groups to acquire feelings concern for the environments.
- To prepare and ensure students participation in the activities organized for preservation and conservation of environment.
- To organize various activities regarding environmental protection with collaboration with other cells i.e. N.S.S., University Outreach Programme

Activities of Environmental Club:-

The college observed various activities to spread awareness about the environment and the need to protect and conserve the ecosystem. For this purpose important days i.e. environment day, ozone day, earth day, water conservation day, van mahotsav are celebrated by organizing different type of activities such as cleanliness drive, tree plantation, awareness rallies, campaign for No Use of Plastic, extension lecture etc.

National level webinar was also organized by department of Geography on the topic “Ecosystem Restoration” on the occasion of environment day.

TREE PLANTATION DRIVE
